Subject: Retention Tank Preliminary Remedial Design reports

Kevin,

We were expecting the Preliminary Remedial Design (PRD) reports for the two sites that were evaluated at each location in the Canal in accordance with the order. In other words, for the top of the canal, we would have expected PRD reports for both RH-3 and RH-4 locations. However, there are only references and drawings for location RH-3 in the submitted report. Before we comment, I wanted to make clear whether you consider the preliminary designs to be identical or whether it is an oversight.

Thank you.

Christos
